Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 10 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Miyazawa et al. (5,809,354).

3. Miyazawa et al. discloses a lens-exchangeable camera system that performs bi-directional communication between the camera body and the camera lens. The claimed “lens controller which can communicate with said body controller, and can send lens type data which indicates said type of said photographing lens to said camera body” is met by lens microcomputer 30, which transmits lens identify signal LIDC to the camera body. The functional language associated with the camera body in the preamble of the claim is intended use and does not impart patentability to the claimed lens.

Allowable Subject Matter

4. Claims 1-9 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter:

6. The prior art does not disclose or suggest "a body controller" that “sends all said body data to said photographing lens regardless of the type of said photographing lens, and sends a portion of said individual function data which is associated with said type of said photographing lens to said photographing lens” in combination with the remaining claim elements as in claims 1-9.

Art Unit: 2851

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. The Miyazawa et al. (5,761,560) reference is cited for teaching an interchangeable lens camera system wherein the lens transmits only the data necessary for the specific type of camera body to which the lens is attached.
